ID: 5728 Print change table slip support different kitchen printer with different format.

This function is for those who wish to decide which printer to print change table slip and not to print.

Eg, your restaurant may have 3 kitchen printer, 1 kitchen, 1 bar and 1 are barcode printer for bubble tea series.

In this situation you can set to print change table slip at kitchen and bar printer while excluding barcode printer.

To do so, go to *More Function > Settings > Kitchen Printer > Edit.*

If you wish not to print at this printer just left it blank as shown at picture above, and if you wish to print just set default with report in it as shown at picture below.
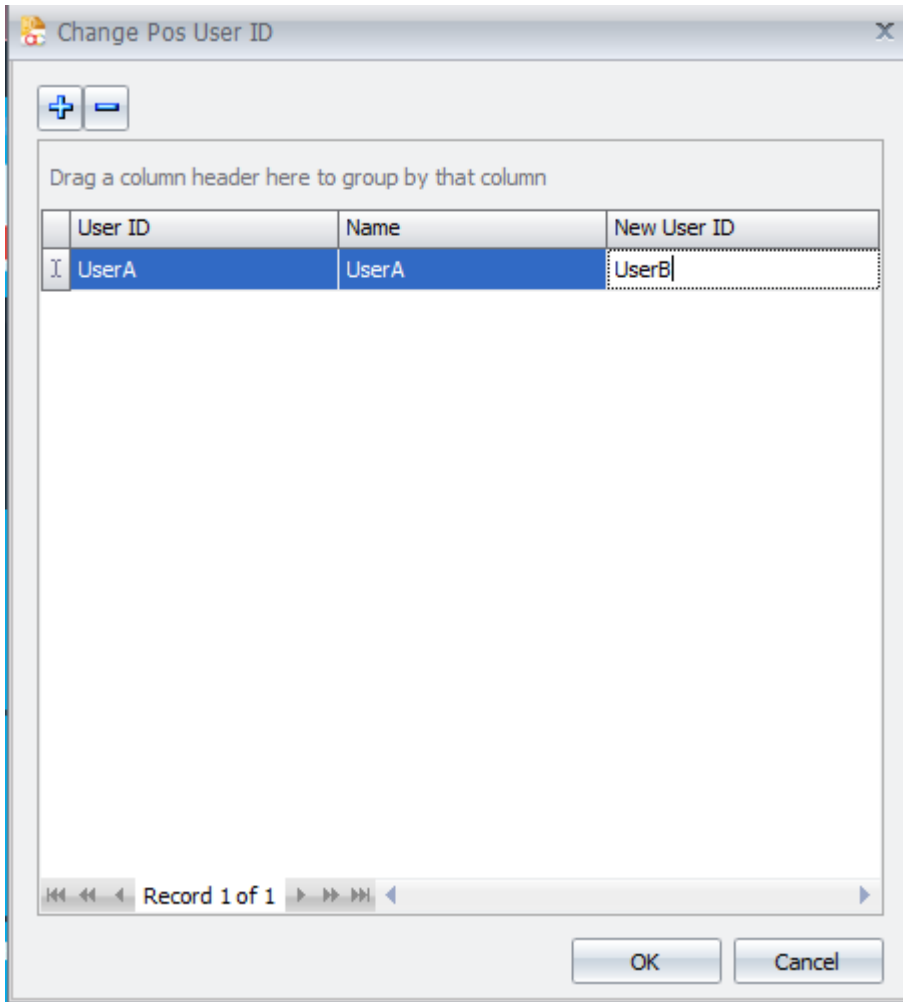

Printer Name	Alternate Printer Name	Report Name (Kitchen)	Report Name (Change Table)	Delete
XP-80C		F&B Kitchen Receipt 1	Change Table Slip	✕

Change table slip format is now designable at front-end *More Function > Settings > Configuration Setting > Receipt.*

ID: 5729 Support change code function for POS user ID.

POS user ID are now able to perform change code.

To change code, go to *POS > Change Code > Change POS User ID.*

ID: 2566 Support multiple quantity for modifier.

Some business nature like bubble tea, ice cream, etc., customer may need to add their topping not once but twice or more. With this new enhancement, user can input multiple modifier.
