Highlights of Changes in 5.0.22.135

ID: 5706 Support User Interface Language by users

We had added UI Language option at POS User Maintenance that allows you to set UI Language for each particular user. In back-end, go to Point of Sale > Maintenance > POS User Maintenance > Edit User.

E.g.: Danish prefer to use our system in Chinese language, and Bevis prefer in English language. Then while Danish login into our front-end system, system will display in Chinese language, but during Bevis login into to front-end system, then the system will display in English instead.

ID: 5811 Support prompt warning message for duplicated item in Promotion Maintenance

Now, if 1 item occurs more than 1 time in a promotion profile, system will prompt a warning message to notify you.

A list of duplicated item will be list out for your reference. Press *Proceed to save* button if you wish to save the promotion anyway.

ID: 5820 Add "Order No" column at Find Transaction screen

In F&B front-end Find Transaction screen, we had added "*Order No*" column for you to see the Order No. of each transaction.

Go to More Function > Inquiry > Find Transaction.

****Note:** You need to pull the "Order No" column out from Column Chooser.
