1.0 Introduction

Lazada Open Platform (Lazop) Plugin allow you to synchronize your products and orders from Lazada Seller Center to AutoCount Accounting. It also allows you to update your product pricing and quantity from AutoCount Accounting to Lazada Seller Center.

This plugin only support in AutoCount Accounting **Version 1.9**

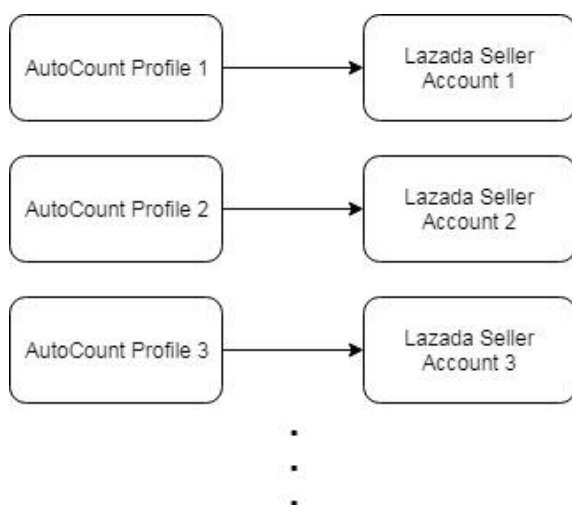

2.0 Installation

The installation steps of Lazop Plugin are similar with installing other AutoCount Accounting plugin.

1. Get the **LazadaOpenPlatform.app** file from your AutoCount Accounting dealer.
2. Login into your AutoCount Accounting.
3. Go to **Tools > Plug-In Manager**.
4. Click on **Install** button.
5. Select the **LazadaOpenPlatform.app** file and open it, then wait for couple seconds.
6. Click on **Install** button.
7. After installation success, logout and login your AutoCount Accounting.

3.0 How to Setup and Link Profile to Lazada Seller Account

You can create multiple profiles in AutoCount with Lazop Plugin, and then link the profile to appropriate Lazada Seller Account.

3.1 Lazada Profile Setting

After install the plugin, first thing to do is setup your Lazada profile in AutoCount.

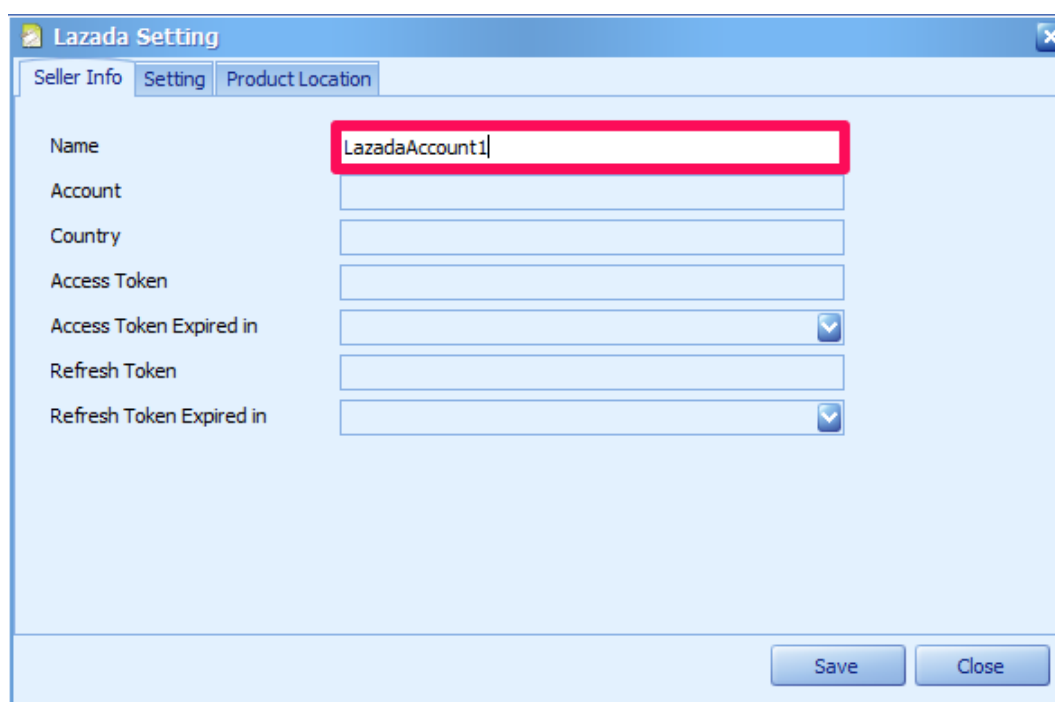

1. Go to **Lazop > Lazada Profile Setting**.

- Click on **New** button to add a new profile. It supports multiple Lazada Seller account.

- Lazada Setting** form will show up.
In Seller Info tab, assign a **Name** for this profile, it can be any name as you like.

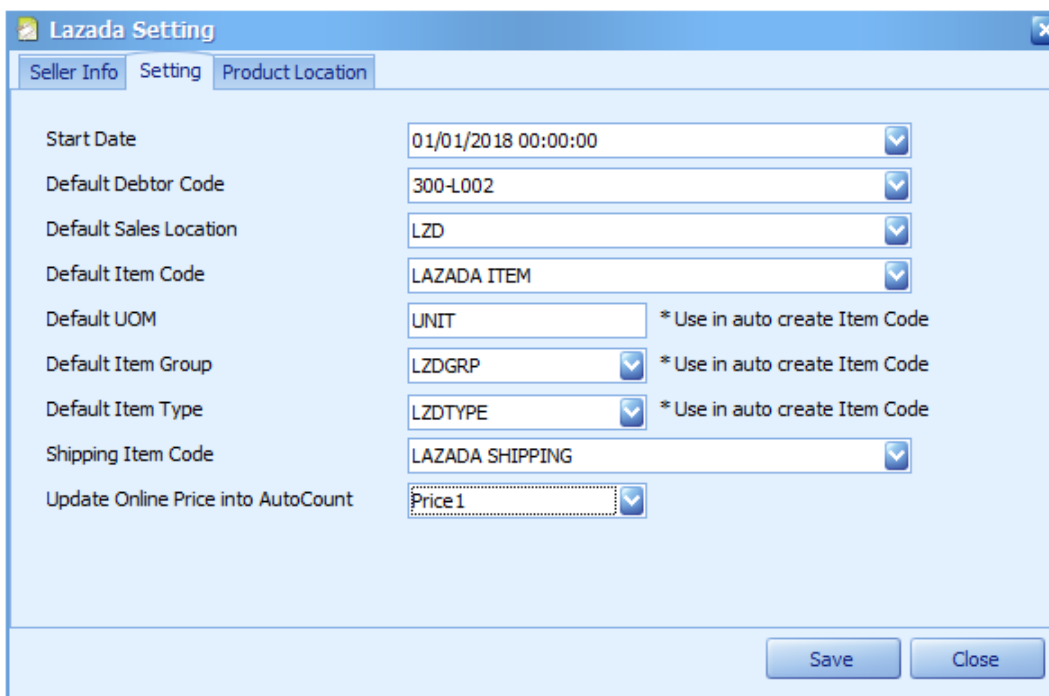

- Navigate to **Setting** tab. You are recommended to fill in everything in here.
Start Date: Use for first time sync orders from Lazada Seller Center to AutoCount Accounting. Lazop Plugin will take all the orders from Lazada Seller Center that created after this date and sync into AutoCount Accounting. Whatever orders before this date will be ignored.
Default Debtor Code: Use when sync orders from Lazada Seller Center to AutoCount Accounting. All orders sync from Lazada Seller Center will use this debtor code.
Default Sales Location: Use when sync orders from Lazada Seller Center to AutoCount Accounting. All orders sync from Lazada Seller Center will use this sales location.
Default Item Code: Use when sync orders from Lazada Seller Center to AutoCount Accounting. If there are certain product that you didn't sync from Lazada Seller Center to AutoCount Accounting / there are certain product you didn't apply mapping in AutoCount Accounting, then system will use this item code.
Default UOM: Use when sync products from Lazada Seller Center to AutoCount Accounting. Since Lazada products don't have any UOM maintained, we will use this UOM when creating a new item in AutoCount Accounting.
Default Item Group: Use when sync products from Lazada Seller Center to AutoCount Accounting. When creating new item that sync from Lazada Seller Center, this Item Group will be used for the item.
Default Item Type: Use when sync products from Lazada Seller Center to AutoCount Accounting. When

creating new item that sync from Lazada Seller Center, this Item Type will be used for the item.

Shipping Item Code: Use when sync orders from Lazada Seller Center to AutoCount Accounting. If there are shipping charges in the order, when sync the order from Lazada Seller Center to AutoCount Accounting, system will use this item code for the shipping fees.

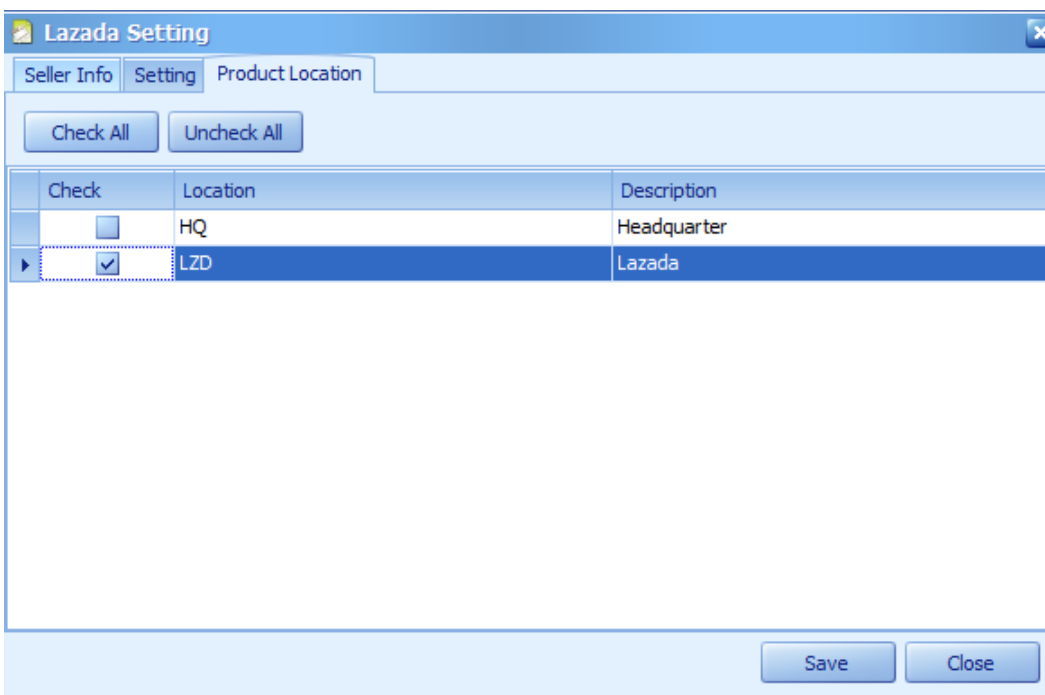

Update Online Price into AutoCount: Use when sync products from Lazada Seller Center to AutoCount Accounting. Choose whether you want to update the product price from Lazada into AutoCount Item Price 1 / Price 2 when sync product.

| Field | Value | Notes |
|------------------------------------|---------------------|--------------------------------|
| Start Date | 01/01/2018 00:00:00 | |
| Default Debtor Code | 300-L002 | |
| Default Sales Location | LZD | |
| Default Item Code | LAZADA ITEM | |
| Default UOM | UNIT | * Use in auto create Item Code |
| Default Item Group | LZDGRP | * Use in auto create Item Code |
| Default Item Type | LZDTYPE | * Use in auto create Item Code |
| Shipping Item Code | LAZADA SHIPPING | |
| Update Online Price into AutoCount | Price1 | |

5. Navigate to **Product Location** tab.

Lazop Plugin will base on the location selected in here to calculate the product's total balance quantity in AutoCount Accounting, and then you can update the total balance quantity to Lazada Seller Center.

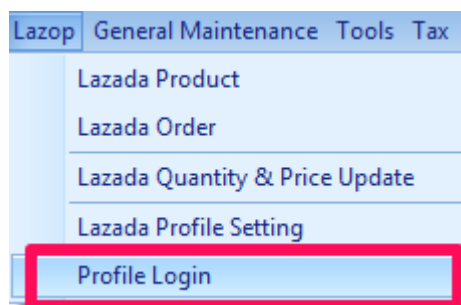

| Check | Location | Description |
|-------------------------------------|----------|-------------|
| <input type="checkbox"/> | HQ | Headquarter |
| <input checked="" type="checkbox"/> | LZD | Lazada |

- Click on **Save** button after you have setup everything. Repeat step 1-6 of you have multiple Lazada Seller Account.

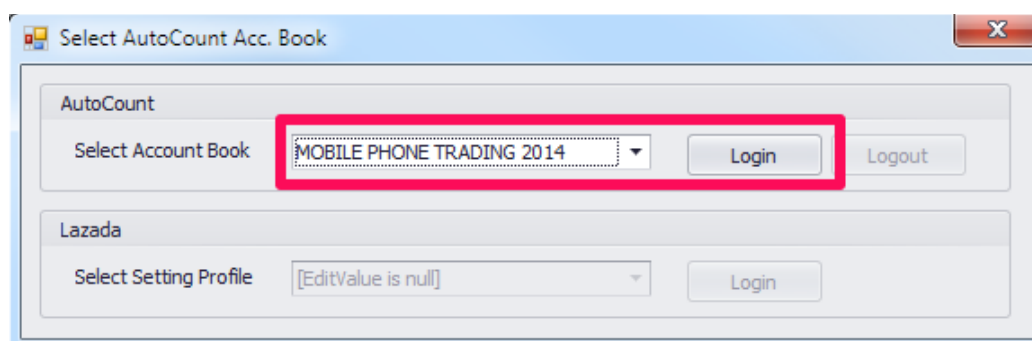

3.2 Profile Login

After you successfully setup the Lazada Profile Setting, then you have to come here and login your Lazada Seller Account to the profile you had created.

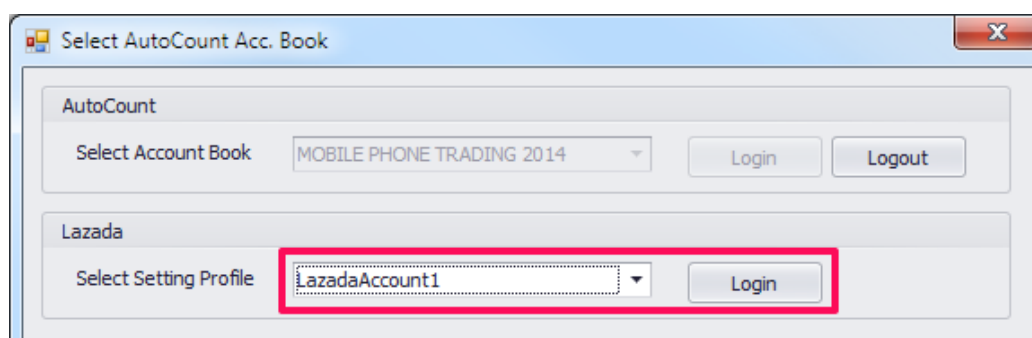

- Go to **Lazop > Profile Login**.

- Select your **current AutoCount Account Book** and click on **Login** button. Only Account Book that had installed Lazop Plugin can be login successfully.

- Select the **profile you created** and click on **Login** button.

- Select your **Country**, key in your **Lazada Seller Account** and **Password**. And then click on **Sign in And Authorize**. Wait for few seconds until the blue color form close automatically.

Sign in and Authorize Permission

The App **[AutoCount Sync]** is requesting permission for these functions:

- Read brands, categories, and attributes information from Lazada system
- Get your transaction statements and fee details in a specified period
- Get documents (invoices or shipping labels) for your orders

AutoCount Item Code: Lazada Shop SKU for the product variation.

AutoCount Item Description: Lazada product description.

AutoCount Item Description 2: Lazada Seller SKU for the product variation.

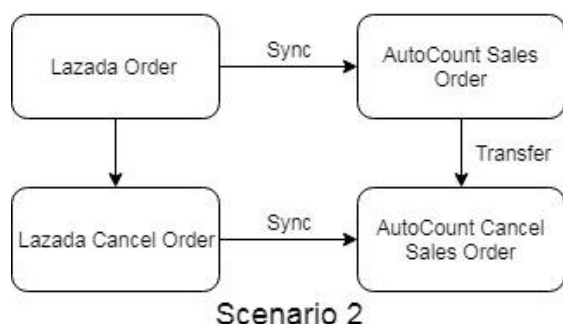

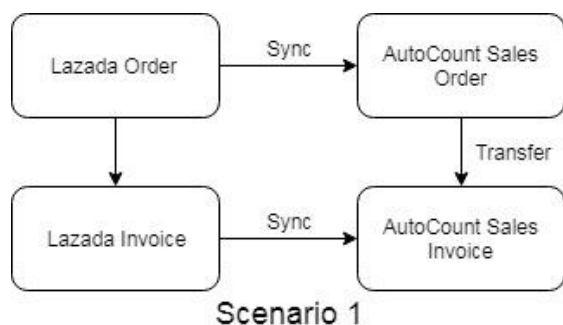

AutoCount Price1 / Price2: Lazada Product Price for the product variation.

5.0 How to sync Lazada Order to AutoCount

With Lazop Plugin, system will sync the orders that come from Lazada seller account to AutoCount as a new document. There are few scenarios that AutoCount will generate different document type for the Lazada order. Refer diagram shown below.

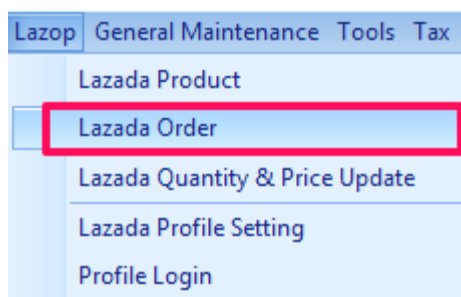

Scenario 1: Lazada seller received order from consumer, when sync to AutoCount, system will generate new Sales Order document. By the time Lazada seller converts the Lazada order to invoice, then will trigger the sync for this order again. After that, system will generate a new Sales Invoice document and it will be transfer from the Sales Order that synced previously.

Scenario 2: Lazada seller received order from consumer, when sync to AutoCount, system will generate new Sales Order document. By the time consumer cancel the Lazada order, then will trigger the sync for this order again. After that, system will generate a new Cancel Sales Order document and it will be transfer from the Sales Order that synced previously.

5.1 Lazada Order Sync

1. Go to **Lazop > Lazada Order**.

2. Select the **profile** and click on **Inquiry** button.

- The order list from your Lazada Seller Account will be displayed.

****The order fulfilled the criteria only will be listed here.**

Criteria: Lazada Orders' Last Update Date > Last Update Date and <= Current Update Date of the profile.

****If Last Update Date of the profile is blank means that this is your first time sync this profile's order.**

System will take the Start Date in the Lazada Profile Setting to replace Last Update Date.

- After synced, you may go to AutoCount **Sales Order**, **Sales Invoice** and **Cancel Sales Order** to look for those documents generated.

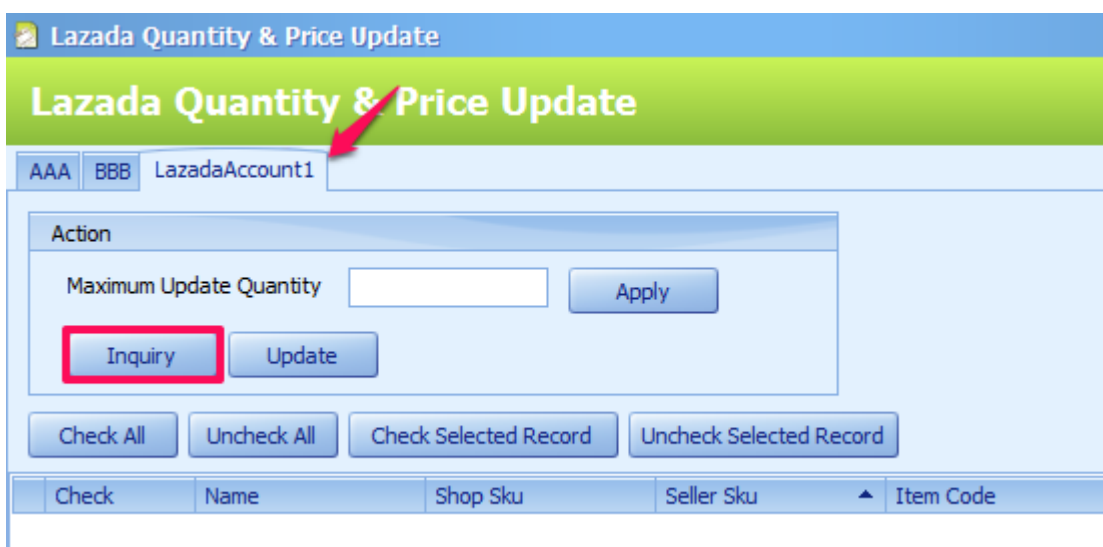

6.0 How to update Quantity & Price to Lazada

You can update Lazada Products' Quantity and Price from AutoCount Accounting with Lazop Plugin.

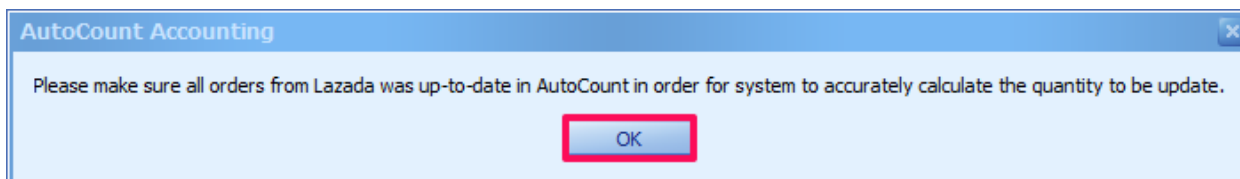

1. Go to **Lazop > Lazada Quantity & Price Update**.

2. Select the **profile** that you want to update quantity or price and then click on **Inquiry** button.

3. Notification box will show up, click on **OK** to continue.
This message is to notify you that you **MUST** ensure that there are no any pending orders to be sync from Lazada to AutoCount. If not, the calculation of the balance quantity of the product will be less accuracy.

4. The available products will be displayed.
****Only those products that are synced / mapped in AutoCount will be displayed here.**
