<b>11553</b>	Implement Ipay88 re-query function to ensure connection are able to made with Ipay88.

*Document Prepared by Jacky*

*Last Modified 27<sup>th</sup> December 2021*

## Highlights of Changes in 3.1.14.55

ID: 11553 Add Ipay88 re-query function.

We have received some feedback that due to connectivity issue, user is having issue regarding Ipay88 ewallet payment issue which is sometimes AutoCount not able to proceed with the transaction due to not receiving confirmation from Ipay88 and meanwhile Ipay88 already logged the transaction in. Therefore, we have added this new feature to retry the transaction if failed. The button will appear if an error had occurred during the payment process.

The screenshot displays the AutoCount software interface during a payment process. At the top, there are fields for 'Promoter', 'Debtor', and 'Cash Sale'. Below these is a table with columns: No., Item Code, Description, UOM, Qty, Unit Price, GST, Tax Code, Discount Amount, and Total. A modal window is open, showing the 'Touch 'n GO eWallet' logo and a QR code field. A red box highlights the 'Re-query Payment' button. Other buttons include 'Print Receipt', 'Preview Receipt', 'OK', and 'Cancel'. The 'Physical Qty = 1.000' is displayed at the bottom of the modal.
