Highlights of Changes in 5.0.8.118

ID: 2903 Front-end POS Support Barcode Printing

In order to access **Print Barcode** function at POS front-end, go to **More Function** and then look for **Print Barcode** under Inquiry.

Functions

Find: Find items and add selected items into the print barcode list.

New: Add a blank row into the print barcode list. Allow you to key in any information and print out.

Delete: Delete selected row from print barcode list.

Clear: Clear all the data from the print barcode list.

Design: Report designer for print barcode reports.

Preview: Preview print barcode reports.

Print: Print out the barcode label.

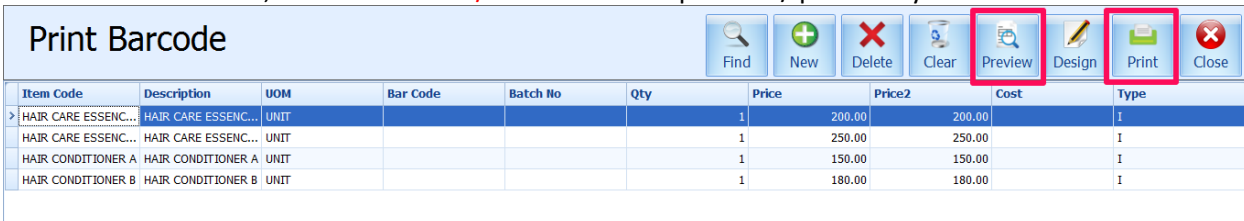

Close: Close Print Barcode screen.

Steps to Preview / Print Barcode label

1. Click on **Find** button to add in the items you want to print as barcode label.

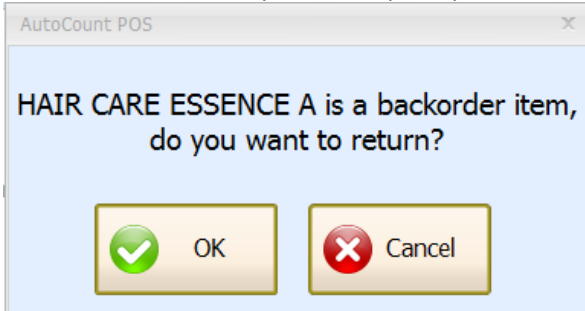

2. After add in items, click on **Preview / Print** button to preview / print out your barcode label.

ID: 3523 Allow to return stock for backorder item

In this version, you are allowed to perform return stock for item that is already in backorder status.

When you login to POS front-end with a user that **WITHOUT POS backorder access right** and then try to **add in a backorder item**, system will prompt and ask whether you want to **perform return** for this item.

Click **OK** and system will proceed to return function as usual.

Click **Cancel** then system will block and ask for supervisor password for backorder control.
