Highlights of Changes in 5.1.0.5

ID: 14019 Support audit trail at frontend login, logout and configuration setting.

To have better audit trail tracking details, we have include login and logout in audit trail. Configuration setting is also an important add-on as staff may purposely edit the running number to avoid certain detection.

To access POS Audit Trail, go to **POS > Miscellaneous Report > POS Audit Trail**.

The screenshot displays the 'POS Audit Trail' application window. It features a search bar at the top with 'Search', 'Clear Search', and 'Close' buttons. Below the search bar are 'Search Criteria' (Description, Event Message, Computer Name) and 'Filter Options' (Date Range, User ID, Supervisor ID, and a grid of event types like New, Edit, Delete, etc.). At the bottom, there are 'Preview', 'Print', and 'Open Same Document Audit Trail' buttons. The main area contains a table of audit events.

Event Date Time	User ID	Terminal ID	Supervisor UserID	Computer Name	Event Type	Description
27/12/2022 17:52	ADMIN	T01		JACKY	Logout	
27/12/2022 17:52	ADMIN	T01		JACKY	Configuration Setting	
27/12/2022 17:52	ADMIN	T01		JACKY	Login	
27/12/2022 17:52	ADMIN	T01		JACKY	SwitchCashier	Switch Cashier

Below the table, an 'Event Message' section shows: 'CashSaleNextNumber from 662 to 663'.
