# autocount® CloudPayroll

Release Note CP 1.0.21

Enhancement

1. Add new field – rounding adjustment in payslip starting with 'B'.
2. Add new option - zero entitlement if entitlement calculation method set 'yearly leave by calendar year'.
   System always defaults to use by join date if the employee no confirm date.

3. Enhance below government report's format:
   (a) SOCSO reports – Borang 2, Borang 8A
   (b) LHDN reports – CP22, CP22A, CP22B, CP21, PCB 2(II), TP3, CP39

Bugs Fixed

1. Fixed TA import configuration – display the selected column info in screen.
2. Fixed the OT rounding issue in payroll process after click refresh button in OT.
3. Fixed LHDN calculator - display the total EPF amount max to RM 4,000.00.
4. Fixed the employee apply balance of hourly leave in his/her last working day.
5. Fixed HSBC employee payment file.
6. Fixed CP39 report – employer address alignment issue.
7. Fixed payroll allowance report - display duplicate info.
8. Fixed payroll summary (allowance & deduction included) report of display allowance & deduction detail if filtered by payroll type.
9. Fixed 'Employee Role' not able to access Leave Management & Claim Management screen.
10. Fixed update leave credit info if user delete & re-process year end.
